

Peppermint

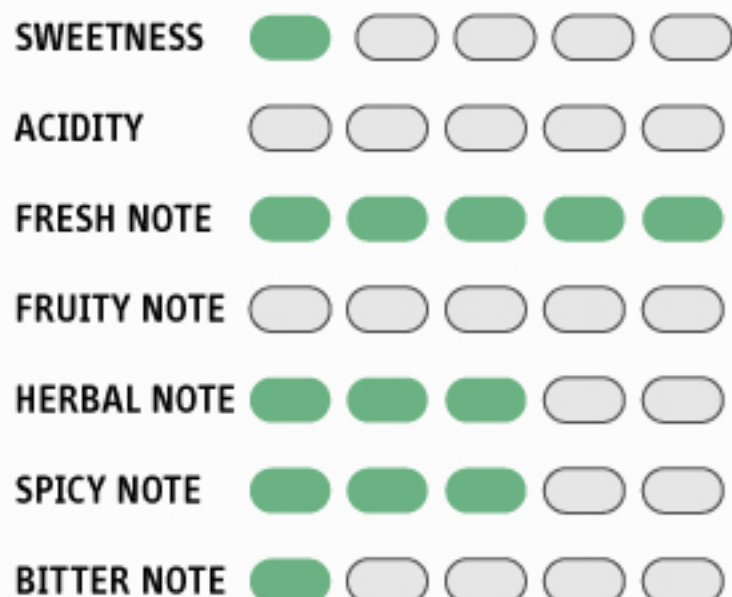

Mentha x piperita

Flavor meets Function

TASTE PROFILE

Cooling, refreshing taste

DIGESTIVE HEALTH

Aids in digestion and calms an upset stomach⁴

IMMUNE HEALTH

Its menthol content provides a sensation of coolness and easier breathing for cough and cold remedies⁴

COGNITIVE HEALTH

Enhances both alertness and memory⁵

Peppermint has a special place in The Martin Bauer Group's history – it was what started the business, that and Marigolds.

In 1930, Martin Bauer founded an herb processing plant. There, he dried Peppermint as well as other herbs in the attic, chopped them finely by hand, and delivered them by bike to customers.

90 years later

The Martin Bauer Group has developed a vast network of high-quality growers and producers, operates multiple processing centers of botanicals in four continents, and offers a range of Peppermint products to fit almost any application.
